

VisArts Summer Camp 2022 Vaccination Policy

All students, teachers, staff, and camp administrators must be **fully vaccinated against COVID-19 by May 1st, 2022**. VisArts follows the guidance as laid out by the CDC, and considers individuals to be fully vaccinated 14 days after their last vaccination.

All campers are required to provide proof of their COVID-19 vaccination, regardless of where they received the vaccination. Proof of vaccination can be submitted by logging into your account and finding the vaccine proof health form. All uploads will be kept in a safe encrypted database and will be kept strictly confidential. Vaccines accepted will include [FDA](#) emergency approved or [WHO](#) authorized vaccines.

Acceptable proof of vaccination status is:

- The record of immunization from a healthcare provider or pharmacy; or
- A copy of the COVID-19 Vaccination Record Card.

All medical information collected from individuals, including vaccination information, health information, test results and any other information obtained as a result of testing, will be kept private and not shared or used for any purposes other than ensuring complete vaccination.

If your child is not fully vaccinated by the time you are registering for camp, no problem! Proof of students' full vaccination status does not have to be submitted until May 1st. VisArts will send periodic reminder emails to those who have not uploaded their child's proof of vaccination before this date. Please note, those registering for camp after May 1st will have to upload proof of vaccination in order to complete their registration. **All registrations that have not provided proof of full vaccination by May 1st, 2022 will be canceled and refunds will be issued in accordance with our refund and cancellation policy which can be found [here](#).**
